## **Professional Experience:**

- Working as Associate Software Engineer at TechSoft Solutions Pvt Ltd from Dec 2022 to till date.

## **Projects Handled:**

- |                 |  |
|-----------------|--|
| 1. Project Name | <b>Alight Upoint/UPN/UCE</b>                                       |
| Environment     | Angular 13,15, HTML, SCSS, javascript, VS Code, Github , Bitbucket |
| Duration        | Dec2023-till date  |
| Team Size       | 10   |

**Description :** Upoint is a legacy application which used by companies to provide employee benefits. It handles giving health plans and insurance to its clients which then gives it to its employees. Basically, the legacy application was written in Liferay Code and we converted it into Angular which increased the speed of the application and better user experience.

### **Roles and responsibilities:**

- Created components which impacts more than million users for various health and insurance plans.
- Implemented Reactive forms and validations for various data inputs from the Users
- Worked on different kind of Bugs of other team and fixed them in critical situations.
- Feature-enhancement as per client request along with the conversion of pages.
- Developed complete UI page alone based on AWLDS changes for EOI.
- Upgrading projects from 8 to 13 and 13 to 15.
- Developed responsive pages for great user experience in multiple devices.
- Used VCS like Git for version control of our application

- |                 |                                   |
|-----------------|-----------------------------------|
| 2. Project Name | <b>API Healthcare.</b>            |
| Environment     | Angular 8, JavaScript, HTML, CSS. |
| Duration        | Dec2022-Nov2023                   |
| Team Size       | 8                                 |

### **Description:**

Developed specifically for healthcare, this solution helps you to optimize your workforce to manage premium labor costs, increase staff engagement, and elevate quality of care through technology, analytics and consultative services.

### **Roles and responsibilities**

- Used HTML and CSS, JavaScript, and Angular.
  - Developing new features based on the requirements.
  - Bug fixing and code rebase/merge with integration lines
  - UI discussions and code review
  - Produced content pages with CSS3 layout and style mark up presentations and also used JS methods and properties.
  - Designed CSS3 based web pages which were cross browser-compatible.
-
