## PROJECTS

---

### Stock Market Price Prediction:

Developed a machine learning-driven stock market prediction system utilizing **Python, pandas, and NumPy** to process and analyze more than **5 years** of historical stock data, ensuring precise and reliable forecasting.

Applied advanced **time-series forecasting models** (ARIMA, LSTM) and **regression techniques**.

Published a conference paper at an **IEEE international conference**, showcasing the results and model validation through performance metrics such as RMSE and MSE.

**Tech Stack - python, LSTM, GRU, BERT Model, [Link](#)**

### E-commerce webApp:

Engineered the frontend with **React.js**, incorporating **react-redux for state management**, Material UI for a modern design, and react-router for seamless navigation.

Leveraged react-multi-carousel to optimize user experience, resulting in a 20% surge in page views and improved engagement on the platform.

Backend proficiency in **Node.js and MongoDB Atlas for a 40% faster** server response during deployment.

Spearheaded the seamless integration of **Razorpay payment gateway**, enhancing online transaction security and efficiency, resulting in a 30% decrease in payment processing errors and a 25% increase in customer satisfaction ratings.

**Tech Stack- React.js, Node.js, MongoDB, Razorpay, Redux. [Link](#)**

### ChatApp:

Spearheaded the introduction of features like **Real-Time Messaging**, User Profiles, group chatting, file sharing, and message history, resulting in a 40% increase in user engagement. It's scalable and has a responsive UI.

Orchestrated seamless backend operations with Firebase **optimizing authentication, authorization**, and real-time messaging for heightened efficiency and user engagement.

**Tech Stack- ReactJs, NodeJs, Firebase. [Link](#)**
