## SUMMARY

B.Tech Computer Science student in the 3rd year with a solid foundation in Java, data structures, and algorithms and Familiar with web development (MERN stack) and MongoDB for database management. and Git/GitHub for framework and version control. Eager to apply and grow my technical skills through projects and real-world industry experience.

---

## EDUCATION

### Guru Nanak Institute of Technology

Bachelor of Technology (B.Tech)

Computer Science and Engineering (CSE)

Expected Graduation: July 2026

---

## PROJECTS

### Foodies Way

*April 2023*

- Developed a dynamic website using React js and Node js allowing users to upload and share recipes.
- Designed an intuitive user interface with HTML and CSS for engaging and responsive interactions, and integrated MongoDB for database management, enabling efficient storage and retrieval of recipe data.
- Deployed the project using Render for hosting and scaling.

### Chatter

*March 2024*

- This project represents my first exploration into full-stack web development using the MERN stack (MongoDB, Express, React, and Node.js), along with Redux for managing control flow.
- The platform enables users to create profiles, follow and unfollow others, and share their thoughts through posts. A key feature allows users to interact with posts by resharing them, creating a dynamic communication environment.

## SKILLS

- **Programming Languages:** Proficient in MERN Stack; experience with Java along Data Structure
  - **Web Development:** front-end knowledge with html,Tailwind css, JavaScript, React js; experience with back-end using Express js , and databases like Mongo db
  - **Soft Skills:** Problem-solving, adaptability, analytical thinking, and team collaboration.
-

## **EXPERIENCE**

**Full Stack Developer Intern**

Ricoz – Remote

June 2024 – September 2024

**Developed the frontend :** Developed the frontend of "Book My Studio" project using React.js and Tailwind CSS to create a responsive and user-friendly interface.

**Designed and implemented APIs:** Designed and implemented APIs for login functionality, studio booking, and Razorpay payment integration, enabling seamless user authentication and transactions.

Collaborated with the backend team to ensure smooth integration between front-end and back-end systems.
