- HTML/Css/Bootstrap
- React

## CERTIFICATION

### JAVA WITH SPRINGBOOT

Udemy

### AWS

Credly

### SQL

Udemy

## WORK EXPERIENCE

### FULL STACK DEVELOPER

Maple Learning Solutions (2024-Present)

As a Full Stack Developer at Maple Learning Solutions, I specialize in building comprehensive web solutions and managing WordPress CRM systems. My work involves creating dynamic, user-friendly websites that meet both client and business requirements, ensuring seamless functionality and a superior user experience.

In addition to web development, I also focus on developing robust Java software applications, leveraging Java and JavaScript to create scalable, high-performance solutions. My expertise in both front-end and back-end technologies allows me to deliver integrated applications that drive success across various platforms.

### JR.SOFTWARE ENGINEER

SpectraMedix (2023-2024)

As a Jr. Software Engineer at Spectramedix, I focused on developing software applications using Java and Spring Boot. This experience honed my skills in creating scalable, high-performance solutions, which I now leverage to deliver integrated applications across various platforms.

## INTERNSHIP EXPERIENCE

During a 4-month internship at XLENX Company, I worked on live projects that provided me with valuable industry experience. This hands-on experience allowed me to apply my technical skills in real-world scenarios, deepening my understanding of software development and preparing me for more advanced roles in the industry.
