## Summary

I am a dedicated and proactive professional with a strong focus on problem-solving and ownership. Coming from a nuclear family, my short-term goal is to secure a position in a reputable company, while my long-term goal is to attain a prominent role where I can contribute to the organization's growth while advancing my own career.

## Experience

### NGO • Muskurahat Foundation

Aug 2022 - Oct 2022

Interned at a foundation, contributing to impactful projects. Collaborated with team members to develop strategies, successfully increasing outreach and engagement. Assisted in organizing events, resulting in heightened community involvement. Conducted research, providing valuable insights for decision-making. Demonstrated strong communication skills while liaising with stakeholders, fostering positive relationships. Proactively tackled challenges, displaying flexibility and adaptability in a fast-paced environment.

## Education

### Masters of Computer Application • GURUNANAK INSTITUTE OF TECHNOLOGY

Dec 2022 – May 2024

MCA • Grade: 8.36

### Bsc IT Cloud Computing and Information Security • TECHNO INDIA SALT LAKE

May 2019 - Feb 2022

Bsc • Grade: 8.14

- Actively pursuing a Master's degree in Computer Applications (MCA) at Gurunanak Institute Of Technology.
- Seeking opportunities to apply theoretical knowledge gained from ongoing MCA program.
- Committed to enhancing skills and knowledge in the field of computer applications.
- Eager to contribute fresh perspectives and innovative ideas to the industry.

## Projects

### Social Networking Website

Aug 2022 - Dec 2022

TECHNO INDIA SALT LAKE

- Collaborated with a group of 3 members to successfully develop a social networking website project, similar to Facebook and Instagram, using HTML, JavaScript, and PhpMyAdmin.
- Demonstrated sincere commitment and dedication throughout the project, ensuring effective teamwork and timely completion.

Implemented impactful features and functionalities, such as user registration, profile creation, news feed, and friend requests, enhancing the overall user experience.

- Utilized HTML, JavaScript, and PhpMyAdmin to design and manage the website's front-end, back-end, and database, respectively.
- Employed action-oriented approach to continuously improve and refine the project, resulting in a highly functional and visually appealing social networking website.
- Received positive feedback from project stakeholders and users for the seamless navigation, intuitive interface, and comprehensive features of the website.

Jan 2024 – May 2024

### Stress Detection and Management in the Modern Workplace: A Comprehensive System Using Bayesian Network Classifiers

GURU NANAK INSTITUTE OF TECHNOLOGY

- The project aims to develop a comprehensive system for detecting and managing stress in modern workplace environments using Bayesian Network Classifiers. The project is handled by a group of five individuals, each contributing unique skills and expertise in areas such as data science, machine learning, software development, and project management.  
**PyCharm:** The primary IDE used for coding and collaboration.
- **Python Modules:** Various Python libraries and modules are employed for tasks such as data analysis, machine learning, and software development.
