WordPress Software Developer

Seeking a challenging career with a progressive organization that provides an opportunity to capitalize my technical skill & abilities and I can also learn something and practice all necessary skill and knowledge.

WORK EXPERIENCE

Trainee Software Developer At Narola Infotech

01/2023 - 07/2023
Intern

I have successfully completed my internship at Narola Infotech , My WordPress training internship was a remarkable chapter in my journey as a web developer. It not only refined my abilities but also instilled in me a passion for continuous growth and excellence. Armed with this knowledge and experience, I now step confidently into the world of web development, eager to make my mark in the industry.

Jr. WordPress Developer At Navkar Enterprise

08/2023 – Presents Employee

As a Junior WordPress Developer at The Growth Consultancy , I had the opportunity to kickstart my career in web development and hone my skills in WordPress, a leading content management system (CMS). In this role, I played a crucial part in enhancing the company's online presence and digital capabilities.

My experience as a Junior WordPress Developer at Navkar Enterprise was instrumental in laying the foundation for my career in web development and honing my skills in WordPress development.

PROJECTS:

❖ **Internship Project:**

1. **The Curious Panda - (A Diary Products Website)**

- *I spearheaded the development of The Curious Panda, a comprehensive health information website designed to engage users with interactive features and tailored content.*

● ***Website Development:*** *Utilized WordPress to create a user-friendly, responsive website.*
● ***E-Commerce Functionality:*** *Integrated e-commerce capabilities to allow users to purchase health-related products directly from the site, streamlining the buying process and expanding service offerings.*
● ***Payment Gateway Integration:*** *Implemented secure payment processing solutions to facilitate seamless transactions, enhancing user experience and ensuring data protection.*
● ***Product Categorization:*** *Designed and integrated a categorized product display system, allowing users to easily navigate and find relevant health products tailored to their needs.*
● ***User Experience Optimization:*** *Focused on creating an intuitive layout and navigation system to ensure that the site is both responsive and user-friendly across all devices.*
● ***Customized Product Section:*** *The customized product section is designed to enhance user interactivity by displaying dynamic content when a tab panel is clicked, seamlessly highlighting the active tab for better navigation. Integrated with a carousel feature, it allows users to explore products effortlessly through smooth transitions, creating an engaging and intuitive browsing experience. The combination of JavaScript-driven functionality and a visually appealing layout ensures a professional and user-friendly interface.*

❖ **The Growth Consultancy - Navkar Enterprises:**

2. **Global Svastha**

- *I spearheaded the development of Global Svastha, a comprehensive health information website designed to engage users with interactive features and tailored content.*

● ***Website Development:*** *Utilized WordPress to create a user-friendly, responsive website that provides accessible health-related information.*
● ***Custom Quiz Feature:*** *Developed a dynamic quiz module that allows users to complete health assessments. Upon submission, users are prompted to make a*

payment to receive personalized results, which are dynamically generated based on their responses and presented in an engaging format.

- **E-Commerce Functionality:** Integrated e-commerce capabilities to allow users to purchase health-related products directly from the site, streamlining the buying process and expanding service offerings.
- **Payment Gateway Integration:** Implemented secure payment processing solutions to facilitate seamless transactions, enhancing user experience and ensuring data protection.
- **Product Categorization:** Designed and integrated a categorized product display system, allowing users to easily navigate and find relevant health products tailored to their needs.
- **User Experience Optimization:** Focused on creating an intuitive layout and navigation system to ensure that the site is both responsive and user-friendly across all devices.

3. Viewise Consultancy

- As a WordPress Developer for Viewise Consultancy, I was instrumental in creating a comprehensive digital platform that enhances our ability to deliver business and career solutions effectively.

- **Website Development:** Developed a fully responsive WordPress website, ensuring an intuitive user interface that caters to a diverse clientele.
- **Content Management System (CMS) Optimization:** Customized and optimized the WordPress CMS to enable seamless content updates, empowering the consultancy team to manage service offerings efficiently.
- **User Engagement Forms:** Created interactive forms for career inquiries and client consultations, enhancing user engagement and streamlining communication between potential clients and our team.
- **Mobile Optimization Design:** Implemented mobile-first design principles to ensure a consistent and user-friendly experience across all devices, improving accessibility and user satisfaction.

- **Preloader Implementation:** Added a custom-coded preloader to enhance user experience during site loading, ensuring a smooth transition into the website content.

4. E-Commerce Projects:

- **Taroopha.com:** Developed an online marketplace focused on creating products from temple offerings and tender coconut. Utilized WordPress and WooCommerce to enhance user experience and streamline product management.
- **Niyarafashion.in:** Built a clothing e-commerce site with a responsive design, integrating payment gateways and optimizing for mobile to improve customer engagement and shopping experience.
- **Taptishop.com:** Customized features for an oil-selling e-commerce platform,

including the development of location-based pricing, enabling dynamic pricing strategies tailored to user locations.

- *These projects strengthened my expertise in e-commerce development, WordPress customization, and user experience optimization.*

❖ Other Projects:

5. Finnovationz

- *I contributed to the development of **Finnovationz**, a single-product page website, by focusing on the frontend design and ensuring a responsive user interface.*

- ● ***Website Development:*** *Leveraged the Next.js framework to build a modern, fast, and interactive single-product page. I utilized React components to create a clean and modular design for easy scalability and maintainability.*
- ● ***Responsive Design:*** *Implemented **Tailwind CSS** to design a fully responsive layout that adapts seamlessly to different screen sizes, ensuring a consistent user experience across devices, from desktops to mobile screens.*
- ● ***E-Commerce Functionality:*** *Integrated e-commerce capabilities to allow users to purchase health-related products directly from the site, streamlining the buying process and expanding service offerings.*
- ● ***User Interface Optimization:*** *Focused on creating an intuitive and visually engaging interface by utilizing Tailwind's utility-first approach for precise styling and quick iterations. The layout is optimized for readability, accessibility, and aesthetic appeal.*
- ● ***Cross-Device Compatibility:*** *Tested and fine-tuned the design to ensure it performs flawlessly on various devices and browsers, delivering a smooth and consistent user experience.*
